Technical Skills

Languages: HTML5 | CSS3 (+ SCSS, BEM) | JavaScript ES6+

Frameworks: React (+ hooks) | Next.js | Material-UI | Redux | Tailwind CSS

Technology: NPM | Git | Yarn | React dev tools | Firebase v9 | GitHub

Experience

Web Developer

Mar 2023 - Current

Startup Kano

- Supported 100+ interns using HTML, CSS, Flexbox, JavaScript and React best practises.
- Increased community engagement by 40% through integrating tech solutions.
- Simplified difficult programming concepts including responsive website development, CSS layout, Promises and API requests.

Frontend Developer Internship

Sep 2022 – Mar 2023

Frontend Simplified

- Transformed a completely static HTML, CSS, JavaScript and React single page application into an interactive user interface using animations, transitions and carousels.
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination and dynamic routing.
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment.

Projects

Personal Website | [Website](#) | [GitHub](#)

- My personal website highlights my programming skills and contain the source code and website links for all my projects listed below.
- Implemented light and dark mode.

E-commerce Web App | [Website](#) | [GitHub](#)

- Integrated Store API with Axios to display products dynamically and Add cart functionality.
- Create a full responsive e-commerce web application using React, JavaScript and BEM CSS.

Social Media App (Twitter Clone) | [Website](#) | [GitHub](#)

- Implemented Sign-In user authentication using NextAuth.JS to display user's name and profile picture on Tweets and comments.
- Implemented posting Tweets, commenting and liking functionality. Stored user generated data in Firebase.
- Created fully responsive social media app using Next.JS, JavaScript, HTML and Tailwind CSS best practices.

Movie App (Filmpire) | [Website](#) | [GitHub](#)

- Developed a movie explorer application using React, implementing reusable components for efficient UI rendering.
- Integrated an API to fetch real-time movie data, enabling seamless search and dynamic content updates.
- Designed a responsive and visually appealing interface using Material-UI to ensure cross-device compatibility.

YouTube Clone | [Website](#) | [GitHub](#)

- Developed responsive React JS web application consisting of stunning video sections, custom categories and channel pages, built using React and Material UI (version 5).
- Fetched data from multiple sources using Rapid API with Axios to implement and display current videos.
- Perfectly placed media queries for satisfactory responsiveness on all devices.
