#### **Technical Skills**

Languages: HTML5 | CSS3 (+ SCSS, BEM) | JavaScript ES6+

**Frameworks**: React (+ hooks) | Next.js | Shadcn-UI | Redux | Tailwind CSS **Technology**: NPM | Git | Yarn | React dev tools | Firebase v9 | GitHub

**Experience** 

#### **Software Developer**

Dec 2024 - Current

Reality AI Lab

- Spearheaded the design and implementation of scalable, user-friendly interfaces utilizing Next.js, enhancing application performance by 35% and improving user engagement metrics by 40%.
- Optimized real-time data workflows by integrating Firestore DB and Redis, resulting in a 30% reduction in data retrieval times and supporting over 10,000 concurrent users without performance degradation.
- Collaborated cross-functionally with design and product teams to implement responsive UI components, leading to a 25% boost in user satisfaction based on post-release feedback and usability testing.

Web Developer Mar 2023 – Dec 2024

Startup Kano

- Supported 100+ interns using HTML, CSS, Flexbox, JavaScript and React best practises.
- Increased community engagement by 40% through integrating tech solutions.
- Simplified difficult programming concepts including responsive website development, CSS layout, Promises and API requests.

#### Frontend Developer Internship | Certificate

Sep 2022 - Mar 2023

Frontend Simplified

- Transformed a completely static HTML, CSS, JavaScript and React single page application into an interactive user interface using animations, transitions and carousels.
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination and dynamic routing.
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment.

# **Projects**

### Personal Website | Website | GitHub

- My personal website highlights my programming skills and contain the source code and website links for all my projects listed below.
- Implemented light and dark mode.

## <u>Library - E-commerce Web App</u> | <u>Website</u> | <u>GitHub</u>

- Integrated Store API with Axios to display products dynamically and Add cart functionality.
- Created a full responsive e-commerce web application using React, JavaScript and BEM CSS.
- Utilized React hooks and context API for efficient state management and smooth user interactions throughout the shopping experience.

## <u>DevFlow - A full-stack Next.js App</u> | Website | GitHub

- Developed a full-stack Q&A platform inspired by StackOverflow, utilizing Next.js 15, TypeScript, and MongoDB to implement advanced rendering strategies (SSG, ISR, SSR, PPR) for optimized performance.
- Integrated AI-powered answer generation, gamification elements, and personalized content recommendations to enhance user engagement and knowledge sharing.
- Implemented secure user authentication with NextAuth (Auth.js), responsive UI components using Tailwind CSS and Shadcn UI, and deployed the application on Vercel for seamless accessibility.

#### Social Media App (Twitter Clone) | Website | GitHub

- Implemented Sign-In user authentication using NextAuth.JS to display user's name and profile picture on Tweets and comments.
- Implemented posting Tweets, commenting and liking functionality. Stored user generated data in Firebase.
- Created fully responsive social media app using Next.JS, JavaScript, HTML and Tailwind CSS best practices.

#### Filmpire - Movie App | Website | GitHub

- Developed a movie explorer application using React, implementing reusable components for efficient UI rendering.
- Integrated an API to fetch real-time movie data, enabling seamless search and dynamic content updates.
- Designed a responsive and visually appealing interface using Material-UI to ensure cross-device compatibility.

## Education

#### Frontend Developer Bootcamp

Frontend Simplified

## **Masters in Public Relations**

Bayero University Kano
